Human Rights Approach to Intellectual Property Protection: The Genesis and Application of Sub-Commission Resolution 2000/7

David Weissbrodt** and Kell Schoff***

I. INTRODUCTION

On August 17, 2000, the United Nations Sub-Commission on the Promotion and Protection of Human Rights (the Sub-Commission) adopted Resolution 2000/7, entitled “Intellectual Property Rights and Human Rights”.¹ This resolution signified the Sub-Commission’s belief that international intellectual property regimes were not adequately accounting for human rights norms.² Resolution 2000/7 called on U.N. Member States, intergovernmental bodies, and various U.N. entities to reaffirm their commitments toward the achievement of international human rights norms, adopt a human rights approach to the development of international intellectual property regimes, and further study the interaction between intellectual property protection and human rights.³

This article will first examine how the seemingly disparate interests of trade and globalization, intellectual property

protection, and human rights norms ultimately converged through the adoption of Resolution 2000/7. It will then review efforts to modify global trade and finance in light of human rights concerns, including what steps have been taken by the U.N. and other international norm-setting institutions in response to the Sub-Commission's call for increased awareness and integration of human rights norms into intellectual property protection regimes. Finally, it will summarize what the Sub-Commission hopes will be its next steps in promoting a human rights approach to international intellectual property protection and trade liberalization.

II. ELEMENTS LEADING TO THE ADOPTION OF RESOLUTION 2000/7

A. INTERNATIONAL AGREEMENTS

A brief review of a few key international agreements will help to frame the rationale behind Resolution 2000/7's call for the integration of human rights norms into intellectual property protection schemes.

1. Human Rights Treaties

In Article 15 of the International Covenant on Economic, Social and Cultural Rights (ICESCR),⁴ the States Parties to the Covenant “recognize the right of everyone . . . [both] to enjoy the benefits of scientific progress and its applications”, on the one hand, and to “benefit from the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he is the author”, on the other.⁵ Hence, international human rights law recognizes the rights of inventors and authors while simultaneously focusing on the public right to benefit from their inventions and works of art. Article 15 does not, however, indicate how a balance might be struck between the creators, the economic interests that acquire their intellectual property, and the beneficiaries of creativity.⁶

Nevertheless, the ICESCR does contain several other provisions bearing upon access to the fruits of inventions. In Article 11, States Parties to the Covenant “recognize the right of everyone to an adequate standard of living . . . including adequate food, clothing and housing, and to the continuous improvement of living conditions.”⁷ Further, States Parties recognize in Article 11 “the fundamental right of everyone to be free from hunger . . . [and accordingly agree to] improve methods of production, conservation and distribution of food by making full use of technical and scientific knowledge”.⁸ In Article 12, the States Parties to the ICESCR also “recognize the

4. G.A. Res. 2200A , *International Covenant on Economic, Social and Cultural Rights*, U.N. GAOR, 21st Sess., Supp. No. 16 at 49, U.N. Doc. A/6316 (1966) (entered into force Jan. 3, 1976) [hereinafter *ICESCR*].

5. *Id.* at art. 15(1).

right of everyone to the enjoyment of the highest attainable standard of physical and mental health” that shall be achieved by the “prevention, treatment and control . . . of diseases” as well as the “creation of conditions which would assure to all medical service and medical attention in the event of sickness.”⁹

There is another balancing process between the rights of inventors or owners of inventions under Article 15 and the rights of the hungry, ill-housed, or the sick who are protected under Articles 11 and 12. Article 2 of the ICESCR provides some guidance as to how governments should achieve these rights. Under Article 2, States Parties only agree to “take steps . . . to the maximum of available resources, with a view to achieving progressively the full realization of the rights recognized in” Articles 11, 12, and 15 of the ICESCR.¹⁰

The Committee on Economic, Social and Cultural Rights, the authoritative interpreter of the ICESCR, has provided specific guidance on how to implement the general and potentially conflicting responsibilities of States Parties.¹¹ The Committee has declared that States Parties have a “minimum core obligation to ensure the satisfaction of, at the very least, minimum essential levels of each of the rights”.¹² In particular, the Committee “emphasize[d] that any intellectual property regime that makes it more difficult for a State party to comply with its core obligations in relation to health, food, [or] education . . . is inconsistent with the legally binding obligations of the State party.”¹³ The Committee’s statement reminded States Parties of the “importance of the integration of international human rights norms into the enactment and

interpretation of intellectual property law” in a balanced manner that protects “public and private interests in knowledge” without infringing on fundamental human rights.¹⁴

A second major human rights treaty relevant to understanding the nexus between human rights and intellectual property, particularly with respect to copyright, is the International Covenant on Civil and Political Rights (Civil and Political Covenant).¹⁵ Article 19(2) of the Civil and Political Covenant provides that “[e]veryone shall have the right to freedom of expression . . . includ[ing] freedom to seek, receive and impart information and ideas . . . either orally, in writing or in print”.¹⁶ Article 19(3), however, allows governments to place substantial restrictions on the broad rights in Article 19(2) in so far as those limitations are “provided by law and are necessary . . . [f]or the protection of national security or of public order (*ordre public*), or of public health or morals.”¹⁷ Unlike the robust and primary freedom of speech guaranteed by the First Amendment to the U.S. Constitution,¹⁸ the heavily restricted freedom of expression granted by Article 19 of the Civil and Political Covenant affords much less basis for arguing that freedom of expression should trump or narrow copyright.¹⁹ Nonetheless, it has been suggested that Article 19 could support an international right to fair use, just as the First Amendment does in the United States.²⁰

14. *Id.* at ¶¶ 17-18.

15. G.A. Res. 2200A, *International Covenant on Civil and Political Rights*, U.N. GAOR, 21st Sess., Supp. No. 16 at 52, U.N. Doc. A/6316 (1966) (entered into force Mar. 23, 1976) [hereinafter *Civil and Political Covenant*].

16. *Id.* at art. 19(2).

17. *Id.* at art. 19(3).

18. U.S. CONST. amend. I.

19. See *Civil and Political Covenant*, *supra* note 15, at art. 19.

20. It is unclear, however, whether a prohibition on fair use might arguably fit within the need to protect “national security or of public order (*ordre public*), or of public health or morals.” *Civil and Political Covenant*, *supra* note 15, at art. 19(3). While the concepts of “national security and public order” have been expansively interpreted in the past couple of years, it is uncertain whether they could be used as a basis for establishing an appropriate balance between copyright and freedom of expression. See also *infra* section II.A(2) for a discussion on the *ordre public* clause in the TRIPS agreement.

There is also a danger in relying too heavily on U.S. precedent pertaining to fair use and the First Amendment. Two recent copyright cases signal a narrowing of the scope of protection for expression available under the fair use doctrine. In *Universal City Studios, Inc. v. Corley*, the Second Circuit hinted at the potential vulnerability of the fair use defense when it noted that “the

Based on language similar to the Civil and Political Covenant's Article 19, the European Convention on Human Rights²¹ informs a human rights approach to intellectual property protection. Article 10(1) of the European Convention on Human Rights recognizes that "[e]veryone has the right to freedom of expression" which includes "freedom to hold opinions and to receive and impart information and ideas without interference by public authority and regardless of frontiers."²² The freedom of expression, however, is heavily circumscribed by Article 10(2), which states that "[t]he exercise of these freedoms . . . may be subject to such formalities, conditions, restrictions or penalties as are prescribed by law and are necessary in a democratic society, in the interests of national security, territorial integrity or public safety, for the prevention of disorder or crime, for the protection of health or morals, [and] for the protection of the reputation or the rights of others".²³

Supreme Court has never held that fair use is constitutionally required". *Universal City Studios, Inc. v. Corley*, 273 F.3d 429, 458 (2nd Cir. 2001). Although the *Universal City Studios* court conceded that "some isolated statements in [the Supreme Court's] opinions might arguably be enlisted for [a fair use] requirement", the Second Circuit's emphatic assertion that "the DMCA [Digital Millennium Copyright Act] does not impose even an arguable limitation on the opportunity to make a variety of traditional fair uses of DVD movies" indicates that U.S. judges are not particularly receptive to fair use arguments that attempt to invalidate current copyright protection laws. *Id.* at 458-59.

In *Eldred v. Ashcroft*, the Supreme Court recently confirmed the difficulty of using fair use as a tool to challenge the constitutionality of federal copyright legislation. *Eldred v. Ashcroft*, 537 U.S. 186 (2003). In upholding the constitutionality of the Copyright Term Extension Act, the Supreme Court declined to impose the "uncommonly strict scrutiny on a copyright scheme that incorporates its own speech-protective purposes and safeguards." *Id.* at 219. It reasoned that because the Copyright Clause and the First Amendment to the Constitution were "adopted close in time . . . copyright's limited monopolies are compatible with free speech principles." *Id.* The Supreme Court went on to state that "[t]he First Amendment securely protects the freedom to make—or decline to make—one's own speech; it bears less heavily when speakers assert the right to make other people's speeches." *Id.* at 191.

In light of the narrow scope of fair use seen in *Universal City Studios* and *Eldred*, advocates of a human rights approach to intellectual property rights should be wary of relying too heavily on U.S. precedent to buttress an argument for a *right* to fair use under Article 19 of the Civil and Political Covenant.

21. *The European Convention on Human Rights*, Council of Europe, (1950), available at <http://www.hri.org/docs/ECHR50.html#C.SecV> (last visited Dec. 2, 2003).

22. *Id.* at § 1, art. 10(1).

23. *Id.* at § 1, art. 10(2).

The Article 10 freedom of expression argument was recently raised in an unsuccessful challenge to English copyright law. In *Ashdown v. Telegraph Group Ltd.*,²⁴ a newspaper publisher that had printed verbatim excerpts from a politician's personal diaries attempted to avoid liability for copyright infringement by arguing that the Article 10 freedom of expression trumped the copyright protection provided by the English Copyright, Patents and Designs Act (CPDA).²⁵ The English Court of Appeal rejected that contention, reasoning that, because "[t]he needs of a democratic society include the recognition and protection of private property . . . [which] includes copyright[.]" there was "no reason why the provisions of the [CPDA] should not be sufficient to give effect to the Convention [Article 10] right subject only to such restrictions as are permitted by Article 10.2."²⁶ Although Article 10 protection for freedom of expression did not control in this particular case, the Court of Appeal nonetheless acknowledged the following:

[R]are circumstances can arise where the right of freedom of expression will come into conflict with the protection afforded by the [CPDA], notwithstanding the express exceptions to be found in the [CPDA]. In these circumstances, we consider that the court is bound . . . to apply the [CPDA] in a manner that accommodates the right of freedom of expression.²⁷

This dictum indicates that courts may in some contexts take human rights norms into account when ruling on intellectual property litigation.²⁸

2. International Intellectual Property Protection: The TRIPS Agreement

In adopting Resolution 2000/7, the Sub-Commission expressed a fundamental concern that the Agreement on Trade-Related Aspects of Intellectual Property²⁹ does not

REV. 72 (2002); Amos Merris, *Can We Speak Freely Now? Freedom of Expression under the Human Rights Act*, 6 EUR. HUM. RTS. L. REV. 750 (2002).

29. Agreement on Trade-Related Aspects of Intellectual Property Rights,

adequately recognize human rights norms.³⁰ Resolution 2000/7 reads in part:

Noting . . . that actual or potential conflicts exist between the implementation of the TRIPS Agreement and the realization of economic, social and cultural rights in relation to, *inter alia*, impediments to the transfer of technology to developing countries, the consequences for the enjoyment of the right to food of plant variety rights and the patenting of genetically modified organisms, “bio-piracy” and the reduction of communities’ (especially indigenous communities’) control over their own genetic and natural resources and cultural values, and restrictions on access to patented pharmaceuticals and the implications for the enjoyment of the right to health,

. . . .

Declares . . . that since the implementation of the TRIPS Agreement does not adequately reflect the fundamental nature and indivisibility of all human rights . . . there are apparent conflicts between the intellectual property rights regime embodied in the TRIPS Agreement, on the one hand, and international human rights law, on the other.³¹

Since TRIPS is such a central focus of the Sub-Commission’s concern, it is appropriate to present a brief overview of the TRIPS Agreement. The Agreement on Trade-Related Aspects of Intellectual Property Rights was a product of the Uruguay Round of the General Agreement on Tariff and Trade (GATT) held in 1994.³² Broadly speaking, TRIPS extended intellectual property rights by endowing the World Trade Organization (WTO) with the power to impose reciprocal trade sanctions.³³ TRIPS requires that WTO States protect intellectual property by enacting national legislation and regulatory procedures.³⁴

Apr. 15, 1994, Marrakesh Agreement Establishing the World Trade Organization [hereinafter WTO], Annex 1C; LEGAL INSTRUMENTS-RESULTS OF THE URUGUAY ROUND vol. 31, 33 I.L.M. 81 (1994) [hereinafter TRIPS Agreement], available at http://www.wto.org/english/docs_e/legal_e/27-trips.pdf. (last visited Dec. 2, 2003).

31. *Id.* at preface & ¶ 2.

32. ROBERT P. MERGES ET. AL., INTELLECTUAL PROPERTY IN THE NEW TECHNOLOGICAL AGE 319-20 (2d ed. 2000).

33. The preface of TRIPS outlines a desire to “reduce distortions and impediments to international trade . . . [by] taking into account the need to promote effective and adequate protection of intellectual property rights, and . . . ensur[ing] that measures and procedures to enforce intellectual property rights do not themselves become barriers to legitimate trade.” TRIPS Agreement, *supra* note 29, at preface. It also recognizes the need for “new rules and disciplines concerning . . . the provision of effective and appropriate means for the enforcement of trade-related intellectual property rights.” *Id.*

34. “Members shall give effect to the provisions of this Agreement.”

TRIPS recognizes that nations will have different policy goals with respect to the scope of intellectual property protection depending on their respective levels of development.³⁵ Article 7 notes that “protection and enforcement of intellectual property rights should contribute to the promotion of technological innovation”.³⁶ At the same time, this protection should also contribute to the “social and economic welfare”.³⁷ Article 8 explicitly mentions that WTO States may take into account the protection “of public health and nutrition, and . . . promot[ion of] the public interest in sectors of vital importance to their socio-economic and technological development” when tailoring their intellectual property regimes to the norms mandated by TRIPS.³⁸ These provisions reveal a fundamental tension in TRIPS between the economic interests of intellectual property rights holders, on the one hand,³⁹ and state and public interests in promoting public health and economic development, on the other.⁴⁰

This tension is reiterated in the specific context of patent protection in TRIPS Articles 27, 28, 30, and 31.⁴¹ Article 28 forms the general rule extending exclusive protection to patent holders.⁴² Article 27, however, permits governments to “exclude from patentability” any inventions in order to “protect

TRIPS Agreement, *supra* note 29, at art. 1.1. “Members shall be free to determine the appropriate method of implementing the provisions of this Agreement within their own legal system and practice.” *Id.*

35. TRIPS prefaces its substantive articles with a recognition of “the special needs of the least-developed country Members in respect of maximum flexibility in the domestic implementation of laws and regulations in order to enable them to create a sound and viable technological base.” TRIPS Agreement, *supra* note 29, at preface.

36. TRIPS Agreement, *supra* note 29, at art. 7.

37. *Id.*

38. “Members may, in formulating or amending their laws and regulations, adopt measures necessary to protect health and nutrition, and to promote the public interest in sectors of vital importance to their socio-economic and technological development, provided that such measures are consistent with the provisions of this Agreement.” TRIPS Agreement, *supra* note 29, at art. 8.1.

39. The patent protection system in most developed countries typically encourages innovation by providing an economic incentive, in the form of a limited term monopoly on the production and sale of the patentable subject matter. In the United States, this policy is rooted in the text of the Constitution, which authorizes Congress “[t]o promote the Progress of . . . useful Arts, by securing for limited Times to . . . Inventors the exclusive Right to their . . . Discoveries.” U.S. CONST. art. I, § 8, cl. 8.

40. See TRIPS Agreement, *supra* note 29, at arts. 8, 27 & 28.

41. See *id.* at arts. 27, 28, 30 & 31.

42. *Id.* at art. 28.1(a).

ordre public or morality, including to protect human, animal or plant life or health or to avoid serious prejudice to the environment”.⁴³ Furthermore, Article 30 describes broad parameters within which it is acceptable for member states to intrude on the exclusivity of patent rights:

Members may provide limited exceptions to the exclusive rights conferred by a patent, provided that such exceptions do not unreasonably conflict with a normal exploitation of the patent and do not unreasonably prejudice the legitimate interests of the patent owner, taking account of the legitimate interests of third parties.⁴⁴

Article 31 specifies the threshold conditions and limitations that must be satisfied if a State wishes to derogate from the exclusivity of the patent protection afforded by Article 28.⁴⁵ Before allowing the use of the subject matter of a patent without the authorization of the patent holder, a government must first attempt to “obtain authorization from the right holder on reasonable commercial terms.”⁴⁶ This requirement, however, can be waived “in the case of national emergency or other circumstances of extreme urgency or in cases of public non-commercial use.”⁴⁷ Even if such exigent circumstances exist, however, the government must limit “the scope and duration of such use . . . to the purpose for which it was authorized”.⁴⁸ Furthermore, such use is to be “terminated if and when the circumstances which led to . . . [the unauthorized use] cease to exist and are unlikely to recur.”⁴⁹ Hence, Articles 30 and 31 frame the balance of interests between intellectual property rights of patent holders, Member States, and the public at large.

TRIPS’ copyright protection primarily guards the copyright interests of literary and artistic creators from developed nations.⁵⁰ Gaps exist in the copyright protection provided for artistic and literary manifestations of traditional knowledge and indigenous culture.⁵¹ TRIPS incorporates Articles 1-21 of the Berne Convention for the Protection of Literary and Artistic

48. *Id.* at art. 31(c).

49. *Id.* at art. 31(g).

50. *See generally* Srividhya Ragavan, Vol. 2 No. 2 MINN. INTELL. PROP. REV. 1 (2001) (describing protection of traditional knowledge and indigenous culture).

51. *See id.* at 17-19.

Works⁵² as the basis for TRIPS copyright protection.⁵³ The language of the Berne Convention does provide some protection for works that encompass traditional knowledge and indigenous culture.⁵⁴ Significantly though, TRIPS does not include the rights and obligations under Berne Convention Article 6^{bis}, which confers moral rights upon copyright holders.⁵⁵ The refusal to recognize moral rights of authors partially explains why some indigenous artists have difficulty in protecting their creations from undesirable modifications or uses.⁵⁶ Furthermore, the remaining TRIPS copyright provisions focus on rights involving computer programs, cinematographic works, sound recordings, and broadcasting.⁵⁷ These TRIPS provisions are more valuable to copyright holders in developed nations than to literary and artistic creators seeking to protect traditional knowledge and indigenous cultural rights.

Intellectual property protection under TRIPS benefits from the enforcement mechanism of the WTO. Under this system, when disputes are raised under WTO law by a government

52. Berne Convention for the Protection of Literary and Artistic Works, Paris Act of July 24, 1971, as amended on Sept. 28, 1979, <http://www.wipo.int/treaties/ip/index.html> [hereinafter Berne Convention].

53. WTO Agreement, *supra* note 29, at art. 9.1.

54. The Berne Convention provides copyright protection for “literary and artistic works,” which include “every production in the literary, scientific and artistic domain, whatever may be the mode or form of its expression, such as . . . works of drawing, painting, architecture, sculpture, engraving and lithography”. Berne Convention, *supra* note 52, at art. 2.1.

55. Berne Convention Article 6^{bis} reads in part:

Independently of the author’s economic rights, and even after the transfer of the said rights, the author shall have the right to claim authorship of the work and to object to any distortion, mutilation or other modification of, or other derogatory action in relation to, the said work, which would be prejudicial to his honor or reputation.

Berne Convention, *supra* note 52, at Article 6^{bis}.1.

56. Upon reading a working draft of this article, one scholar noted:

While it’s true that [indigenous authors] sometimes have difficulty protecting their works under established intellectual property doctrines, this relates to broader issues than moral rights. In particular, differing conceptions of ownership and differing understandings [of] the desirability of claiming exclusive rights often underlie the inadequacy of protection. Thus, even if TRIPS were amended to protect moral rights, many indigenous authors would still face these same difficulties.

Comments of Professor Laurence R. Helfer, Loyola Law School (Los Angeles, CA) (Jan. 2003) (copy on file with author). For a further discussion of problems involving intellectual property protection of indigenous rights, see generally *infra* part II.B.

57. See WTO Agreement, *supra* note 29, at arts. 10-14.

seeking examination of the legality of a national measure, the result is a binding decision addressing the validity of the national regulation.⁵⁸ If the complaining nation prevails, it may then place retaliatory tariffs on goods from the defending country.⁵⁹

3. Dealing with Differences and Overlaps Between Human Rights Law and TRIPS

As compared with the robust sanctions-based enforcement mechanism of TRIPS within the WTO, human rights treaties have modest implementation procedures. Both the Human Rights Covenants require that States Parties report periodically on their progress in achieving the rights in the respective treaties.⁶⁰ These reports are reviewed by 18-member treaty bodies elected by the States Parties.⁶¹ The treaty bodies conclude their reviews of state reports by issuing concluding comments in which issues are raised and recommendations are made.⁶² When the government needs to make a further report, usually after a couple of years, these concerns should be the subject of attention. The Human Rights Committee also has the capacity to adjudicate complaints from the individual residents of the 104 nations that have ratified the Optional Protocol to the International Covenant on Civil and Political Rights.⁶³ However, Committee decisions are not considered to be binding.⁶⁴ Indeed, human rights norms are principally

58. See THE WTO SECRETARIAT, GUIDE TO THE URUGUAY ROUND AGREEMENTS 18-27 (1999) (discussing dispute settlement through the WTO).

59. See *id.* at 23-24 (“For a government found at fault in a dispute, the possibility of [tariffs as the] ultimate sanction of retaliation is undoubtedly a strong inducement to settle the matter by withdrawing the offending measure or by giving compensation.”); see also G. Richard Shell, *Trade Legalism and International Relations Theory: An Analysis of the World Trade Organization*, 44 DUKE L.J. 829, 832 (1995) (discussing the WTO dispute resolution system). While it can be argued that sovereign states can still ignore a WTO ruling, the cost associated with retaliatory tariffs, and the threat that such a decision poses to the viability of the entire WTO system and the world export economy militate against such a response. See THE WTO SECRETARIAT, *supra* note 58, at 24 (discussing retaliation measures).

60. See ICESCR, *supra* note 4, at art. 16 & 17; see also *Civil and Political Covenant*, *supra* note 15, at art. 40.

61. See, e.g., *Civil and Political Covenant*, *supra* note 15, at art. 28.

62. See *id.* at art. 40.

63. See G.A. Res. 2200A, *Optional Protocol to the International Covenant on Civil and Political Rights*, U.N. GAOR, 21st Sess., Supp. No. 16 at 59, art. 1, U.N. Doc. A/6316 (1966) (entered into force Mar. 23, 1976) [hereinafter *Optional Protocol*].

64. See *id.* at art. 5(4) (considering Committee decisions as “views”

implemented at the international level by persuasion and embarrassment rather than sanctions.⁶⁵ Hence, there is an imbalance in the way international obligations are effectuated under TRIPS and human rights treaties.

A related problem posed by the creation of the WTO with its incorporation of TRIPS is its failure to address any conflicts that arise under international law when a country has ratified treaties that may differ with its obligations under the WTO. A nation cannot generally absolve itself of its obligations under one treaty by ratifying a second treaty later.⁶⁶ In a situation in which there is a potential conflict, the Vienna Convention on the Law of Treaties calls for the interpretation of the two treaties so as to give effect to both.⁶⁷ It might be argued that WTO law, including TRIPS, qualifies as *lex specialis*. However, that argument would not exempt nations from their human rights obligations and would not prevent human rights treaty bodies from assessing the human rights implications of intellectual property measures.⁶⁸ Hence, despite the stronger

without requiring action by the State Party).

65. See DAVID WEISSBRODT & TERESA O'TOOLE, *THE DEVELOPMENT OF INTERNATIONAL HUMAN RIGHTS LAW* 17, 25 (Human Rights, the United Nations and Amnesty International 1988); see also DAVID WEISSBRODT, ET. AL, *INTERNATIONAL HUMAN RIGHTS: LAW, POLICY, AND PROCESS* 10-11 (3rd ed. 2001) (discussing the rare availability of sanctions).

66. See Vienna Convention on the Law of Treaties, 1155 U.N.T.S. 331 (Jan. 24, 1980) at art. 30(4) (discussing the obligations of countries that are not all parties to an earlier treaty) [hereinafter Vienna Convention]. In the unlikely situation in which all the parties to both treaties are the same, however, and the two treaties relate to the same subject matter, the first treaty may be considered amended by the second treaty. *Id.* Under the Vienna Convention on the Law of Treaties, "when all the parties to [an] earlier treaty are parties also to the later treaty but the earlier treaty is not terminated or suspended in operation . . . the earlier treaty applies only to the extent that its provisions are compatible with those of the later treaty." *Id.* at art. 30(3). Hence, the later treaty is controlling where there is a conflict, and so is treated as an amendment to the earlier treaty. See *id.*

67. "When a treaty specifies that it is subject to, or that it is not to be considered as incompatible with, an earlier or later treaty, the provisions of that other treaty prevail." Vienna Convention, *supra* note 66, at art. 30(2). To the extent that the treaties are compatible, then, each is given effect. At least one WTO Panel Report acknowledges that States Parties must seek interpretations that avoid violating both treaties. See *Indonesia – Certain Measures Affecting the Automobile Industry*, Report of the Panel on Indonesia, WT/DS54/R, WT/DS55/R, WT/DR59/R, WT/DS64/R (July 2, 1998) (stating that "under public international law there is a presumption against conflicts").

68. Although the WTO is a specialized agency established under Article 57 of the U.N. Charter, that provision does not give the WTO superior legal powers. The U.N. Charter protects human rights in Articles 1, 55, and 56. See U.N. CHARTER art. 1 (citing human rights as a purpose of the U.N.); U.N.

implementation procedures of the WTO, governments are obligated to seek interpretations of both TRIPS and the human rights treaties that would avoid violating either treaty regime.

The WTO has given short shrift to human rights norms when deciding conflicts in the dispute resolution system. The WTO Dispute Settlement Panels and Appellate Body are primarily focused on scrutinizing the legality of national measures under GATT/WTO law.⁶⁹ They are not required to balance various sectors of national or international law with trade law.⁷⁰ Further, the WTO dispute resolution system has

CHARTER art. 55 (calling for observance of human rights without regard to race, sex, language, or religion); U.N. CHARTER art. 56 (calling for joint and separate action under Article 55). Further, under Article 103, the U.N. Charter should be considered controlling. See U.N. CHARTER art. 103 (indicating that in case of conflict between obligations under the Charter and another international agreement, those under the U.N. Charter should prevail). The authority for establishment of specialized agencies under Article 57 of the Charter does not diminish the impact of Articles 1, 55, 56, and 103. See U.N. CHARTER art. 57 (establishing agencies subject to acceptance by the General Assembly as discussed in Article 63).

69. The Dispute Settlement Panels handle disputes under “covered agreements”, which include only GATT/WTO law: the agreement establishing the WTO, multilateral trade agreements, and plurilateral trade agreements. Understanding on Rules and Procedures Governing the Settlement of Disputes, App. 1., 33 I.L.M. 1244 (1994) [hereinafter Understanding]. The WTO’s Dispute Settlement Body cannot “add to or diminish the rights and obligations provided” in the covered WTO agreements and human rights instruments are not among the WTO agreements. *Id.* at art. 3(2).

70. *Id.* at art. 1 (stating that the agreement covers the documents listed in Appendix I, but not mentioning any balancing of national concerns). One could argue that some aspects of human rights law, such as the prohibition of genocide and slavery, constitute *jus cogens* and would thus prevail over contrary provision of WTO law. But there is very little agreement as to which principles qualify as *jus cogens*, so that argument would probably not broaden the jurisdiction of the WTO Dispute Settlement Body or the qualifications of its members.

One scholar has noted, however:

[T]here is some indication from the *Shrimp/Turtle* case, Report of the Appellate Body, *United States – Import Prohibition of Certain Shrimp and Shrimp Products*, WT/DS58/AB/R (Oct. 12, 1998) that WTO jurists are willing to consider not only non-trade treaties but also non-trade soft law when interpreting WTO agreements. In *Shrimp/Turtle*, the Appellate Body concluded that the phrase “exhaustible natural resources” was an “evolutionary” concept to “be read by a treaty interpreter in the light of contemporary concerns of the community of nations about the protection and conservation of the environment. Those concerns, in turn, were reflected not only in treaties regulating natural resources but also in nonbinding “declarations” addressing that topic. A similar approach might be applied to “evolutionary” terms in TRIPS (especially the open-ended phrases in Articles 7 and 8), giving them a meaning that takes into account human rights norms endorsed by the international

been criticized for its lack of transparency and openness to input from *amici curiae* and other procedures for knowledgeable input from outside the trade field.⁷¹ Therefore, the imbalance in the way international obligations are realized under TRIPS and the human rights treaties was a significant motivating factor in the Sub-Commission's decision to adopt Resolution 2000/7.

B. GAPS IN PROTECTING TRADITIONAL KNOWLEDGE, INDIGENOUS CULTURE, AND HUMAN RIGHTS

Alleged violations of indigenous cultural property rights attained visibility during the 1990s, before the immediate impetus for the adoption of Resolution 2000/7 arose. Three examples of indigenous cultures clashing with intellectual property regimes indicate why the Sub-Commission felt compelled to advocate human rights protection of traditional knowledge as part of its resolution.

The first two examples illustrate the insufficiency of copyright schemes to protect Aboriginal Australian cultural interests adequately. In the first case, an Aboriginal artist named Terry Yumbulul created an artifact called a Dreaming Star Pole, which represents where one's soul goes after death.⁷² The artifact is sacred to the Aborigines, and Mr. Yumbulul had to undergo initiation rights in order to be allowed to create the

community.

Comments of Professor Helfer, *supra* note 56.

Professor Helfer also noted that imbalances between TRIPS and human rights treaties seen in the context of enforcement and implementation procedures extend to substantive norms as well: "Particularly in the case of economic, social and cultural rights . . . [the human rights] treaties articulate norms at relatively high levels of generality as compared to the precise and detailed rules that TRIPS imposes. *Id.*; *c.f.* TRIPS Agreement, *supra* note 29, at art. 30 (dealing with patents). "It is hard to see a conflict between these treaty provisions because Article 12 is quite general in scope." Comments of Professor Helfer, *supra* note 56. Helfer goes on to note, however, that conflicts do emerge upon consideration of the Economic and Social Committee's General Comments. *Id.* For discussion of the Economic and Social Committee's General Comments, see *infra* part IV.D.

INT'L L. 17-18 (forthcoming 2003) (noting the effort of the Appellate Body to call for *amici curiae* briefs in the *E.C.- Asbestos* case, the criticism of that request by WTO Members, and the response of the Appellate Body in the *US - Certain E.C. Products* decision).

72. Symposium, *Global Intellectual Property Rights: Boundaries of Access and Enforcement, Panel II: The Law and Policy of Protecting Folklore, Traditional Knowledge, and Genetic Resources*, 12 FORDHAM INTELL. PROP. MEDIA & ENT. L.J. 753, 760 (2002).

artifact.⁷³ Mr. Yumbulul assigned the copyright on the artifact to an agent,⁷⁴ who then passed reproductions of the artifact to the Reserve Bank of Australia, which used the image on an Australian bank note.⁷⁵ Mr. Yumbulul brought suit⁷⁶ against the Reserve Bank in an attempt to prevent distribution of the notes, which the clan considered a blasphemous use of their sacred image.⁷⁷

The High Court of Australia court ruled in favor of the Bank, on grounds that the copyright had been validly assigned.⁷⁸ The court, however, noted that Australia's copyright law might not "provide adequate recognition of Aboriginal community claims to regulate the reproduction and use of works which are essentially communal in origin", but declined to provide relief because "the question of statutory recognition of Aboriginal communal interests in the reproduction of sacred objects is a matter for consideration by law reformers and legislators."⁷⁹

The second Australian copyright case concerned the use of an Aboriginal painting as a template for a design woven into Vietnamese-manufactured carpets.⁸⁰ The painting, displayed in the National Gallery of Australia, depicts a story of the Dreamtime.⁸¹ The use of a sacred image as a decoration on which to walk was considered highly offensive by the artists and their clan.⁸² The artists, on behalf of the clan,⁸³ sued to

76. *Yumbulul v. Reserve Bank of Australia*, (1991) 21 I.P.R. 481 (Austral.).

77. See Blakeney, *supra* note 74, at 2 (referencing criticism of *Yumbulul* by the Aboriginal community for the offensive use).

78. *Yumbulul*, 21 I.P.R. at ¶ 23.

79. Blakeney, *supra* note 74, at 2 (citing *Yumbulul* and discussing the inadequacy of copyright law in protecting expressions of Aboriginal folklore).

80. *Milpurrurru v. Indofurn Pty. Ltd.*, (1994) 54 F.C.R. 240 (Austl.).

81. The Dreamtime is the Aboriginal collection of folklore concerning the creation of the world; and virtually all Aboriginal artwork depicting stories of the Dreamtime are semi-sacred. Symposium, *Global Intellectual Property Rights*, *supra* note 72.

82. *Milpurrurru*, 54 F.C.R. at ¶ 18.

83. Aboriginal custom holds that the Dreamtime stories are passed down through tribal custodians. The right to create depictions of the Dreamtime is similarly passed down from artist to artist. These custodians act as the keepers of the clan's knowledge on behalf of their people. Blakeney, *supra*

enjoin the use of the image, alleging cultural harm suffered by the clan as a whole.⁸⁴ The High Court of Australia tried to compensate the Aborigines for the cultural harm they suffered, awarding damages to each of the living artists for “flagrant”⁸⁵ copyright infringement.⁸⁶ Nonetheless, the court refused to award damages to the clan as a whole because Australian copyright law did not provide a remedy for the alleged infringement of a collective ownership right.⁸⁷

The *Yumbulul* and *Milpururru* cases highlight gaps in the protection of indigenous rights under existing copyright law regimes. Both cases turn in part on the problem of establishing authorship.⁸⁸ Many indigenous peoples claim a collective right of ownership, or alternatively assert that styles of art have been passed down from generation to generation.⁸⁹ Such assertions raise issues of standing to bring suit, and duration of protection to be conferred.⁹⁰ Furthermore, even in cases like

note 74, at 5.

84. *Milpururru*, 54 F.C.R. at ¶ 12.

85. Australian law allows for increased compensatory damages for copyright infringement in cases where the infringement was executed with “total disregard not only for the legal rights of the plaintiff regarding copyright but for his feelings and his sense of family dignity and pride.” *Williams v. Settle*, 1 W.L.R. 1072, 1082 (1960) (Eng. C.A.). In the *Milpururru* case, it was established that the Aboriginal depictions had been designated for educational display only, and that the artists had indicated that use of the images on carpets would be highly offensive to themselves and their clan. *Milpururru*, 54 F.C.R. at ¶¶ 13–16.

86. Each artist was awarded Australian \$15,000 to “reflect the harm suffered . . . in their cultural environment.” Blakeney, *supra* note 74, at 4.

87. The *Milpururru* court stated that “[t]he statutory remedies do not recognise the infringement of ownership rights of the kind which reside under Aboriginal law in the traditional owners of the dreaming stories and the imagery such as that used in the artworks of the present applicants.” *Milpururru*, 54 F.C.R. at ¶ 127. See Blakeney, *supra* note 74, at 5 (noting that Australian copyright law provides remedies for infringement in proportion to the economic damage caused by the infringement, and further noting that it was untenable to think that the court could quantify the extent of economic damage to the Aboriginal cultural right).

88. *Yumbulul v. Reserve Bank of Australia*, (1991) 21 I.P.R. 481, ¶ 21 (Austral.); Blakeney, *supra* note 74, at 2.

89. *Yumbulul*, 21 I.P.R. at ¶ 21.

90. Many copyright regimes require a specific, identifiable author, or at least some identifiable entity that created the subject matter, in order to confer copyright protection. Blakeney, *supra* note 74, at 5. Since an entire indigenous clan or regional population generally does not participate in the creation of a particular artifact, there is a question of who exactly has suffered a legal harm for which they can pursue a legal remedy. Furthermore, in cases where indigenous peoples claim that the original depictions were created by ancestors thousands of years ago, most copyright systems provide scant protection, since the original author’s life and limited term of protection has

Milpurrurru where courts do provide a remedy, it usually takes the form of monetary compensation.⁹¹ In many cases, pecuniary gain could never fully compensate for the cultural harm suffered in these situations, and does little to deter future offenses.⁹²

The cultural harms suffered in the *Milpurrurru* and *Yumbulul* cases implicate rights guaranteed under the ICESCR. Article 15(1)(a) of the ICESCR recognizes the right of everyone “to take part in cultural life”, and Article 15(1)(c) recognizes the right of everyone “[t]o benefit from the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he is the author.”⁹³

The third traditional knowledge case, which received greater publicity, related to the validity of a patent on an extract from the oil of an Asian tree.⁹⁴ The neem tree is indigenous to the Indian subcontinent.⁹⁵ Neem bark has been used for centuries as a traditional medicine, insecticide and fungicide.⁹⁶ The pharmaceutical manufacturer W.R. Grace Co. initially obtained a patent⁹⁷ from the European Patent Office (EPO) on the fungicidal properties of a neem oil extract, and then cheekily tried to sell the patented product on the Indian market.⁹⁸ Upon appeal by the Green Party of the European Parliament and an Indian nongovernmental organization (NGO), the EPO revoked the patent on grounds that it did not qualify as a novel invention in light of the traditional use of neem bark in Indian society.⁹⁹ The EPO’s revocation of a patent on neem tree oil extract was a rare victory for traditional scientific knowledge over modern patent schemes.¹⁰⁰

99. Hoggan, *supra* note 94.

100. Besides increasing public awareness of the grave risks that corporations would unjustly exploit indigenous and traditional knowledge, the neem tree case raised three additional points of interest. First, the U.S. Dept. of Agriculture was a co-applicant with W.R. Grace for the neem oil patent. See Hoggan, *supra* note 94. Hence, the U.S. government contributed to and encouraged exploitation of traditional knowledge under current intellectual

Responding to concerns arising from cases like the neem tree, *Milpurrurru*, and *Yumbulul*, Sub-Commission member Dr. Erica-Irene A. Daes has advocated the protection of indigenous cultural and property rights.¹⁰¹ As Chairperson and Rapporteur of the Sub-Commission's Working Group on Indigenous Populations, Dr. Daes was the principal author of the Draft Declaration on the Rights of Indigenous Peoples.¹⁰² This Draft Declaration¹⁰³ called for the broad recognition and respect for indigenous peoples' rights, including cultural and intellectual property rights.¹⁰⁴ Dr. Daes continued to campaign

property regimes. Second, the plaintiffs in the revocation action argued that, in addition to non-novelty, Grace's patent should be revoked as "against public morality." Decision Revoking European Patent No. EP0436257, European Patent Office (Feb. 13, 2001) (available from European Patent Office; on file with editor) (European Patent Convention (Jan. 2000) Art. 53 reads in part: "[P]atents shall not be granted in respect of inventions the publication or exploitation of which would be contrary to [the public order] or morality"). Although the EPO declined to rule on that question, the fact that the argument was brought at all signals a move towards using human rights arguments as a means of combating unfair intellectual property determinations. Similar arguments could be advanced in future patent disputes in the context of TRIPS, which contains a "public morality" article similar to the one in the European Patent Convention. See WTO Agreement, *supra* note 29, at art. 27.2. "Members may exclude from patentability inventions, the prevention of which within their territory . . . is necessary to protect *ordre public* or morality." *Id.* Third, the EPO revoked the neem tree oil patent in part because the European Parliament's Green Party advocated the patent appeal. In the absence of influential and knowledgeable allies like the Greens, indigenous peoples may lack the resources to raise successful objections to the appropriation of their traditional knowledge by wealthy corporations.

103. *Discrimination Against Indigenous Peoples: Report of the Working Group on Indigenous Populations on its eleventh session*, U.N. ESCOR, Commission on Human Rights, Sub-Commission on Prevention of Discrimination and Protection of Minorities, 45th Sess., Agenda item 14, annex I, U.N. Doc. E/CN.4/Sub.2/1993/29 (1993) [hereinafter *Draft Declaration*]. The U.N. Commission on Human Rights has referred the draft Declaration to its Working Group on the Draft United Nations Declaration on the Rights of Indigenous Peoples, where it has been under consideration since 1989. Daes, *supra* note 102, at 494.

104. Article 29 reads:

Indigenous peoples are entitled to the recognition of the full ownership, control and protection of their cultural and intellectual property.

They have the right to special measures to control, develop and protect their sciences, technologies and cultural manifestations, including human and other genetic resources, seeds, medicines, knowledge of the properties of fauna and flora, oral traditions,

for indigenous peoples' interests,¹⁰⁵ emphasizing that U.N. Member nations must not only recognize the existence of indigenous peoples' rights, but also enact national legislation providing stringent substantive and jurisdictional protection of those rights.¹⁰⁶

Dr. Daes' *Principles and Guidelines for the Protection of the Heritage of Indigenous Peoples* indicates how indigenous rights can be more effectively protected.¹⁰⁷ Collective ownership and custodial ownership created through initiation procedures should be recognized and incorporated into national legal systems.¹⁰⁸ Patent and copyright protection for indigenous knowledge should be available only after the traditional owners' free and informed consent has been secured.¹⁰⁹ States should create prompt and effective judicial measures to allow traditional owners to "prevent, punish and obtain full restitution and just compensation" for unlawful acquisition or use of their cultural heritage.¹¹⁰ In addition, "[b]usiness and industry should ensure they have . . . free and informed consent of indigenous peoples when entering into agreements for the rights to . . . use previously undescribed [*sic*] species or cultivated varieties of plants, animals or micro-organisms, or naturally occurring pharmaceuticals."¹¹¹ Moreover, "[a]ny

literatures, designs and visual and performing arts.

agreement should ensure that the indigenous peoples concerned continue to be primary beneficiaries of commercial application.”¹¹² Further, “[i]ndigenous peoples and their representative organizations should . . . participate in[] all intergovernmental discussions and negotiations in the field of intellectual property rights, to share their views on the measures needed to protect their heritage through international law.”¹¹³ These guidelines address many of the inadequacies of intellectual property protection for traditional heritage highlighted in *Yumbulul*,¹¹⁴ *Milpururru*,¹¹⁵ and neem tree cases.¹¹⁶ Ultimately, since legal regimes often provided inadequate protection for indigenous peoples’ knowledge, culture, and human rights, the Sub-Commission explicitly to refer to these concerns as a motivating factor for the adoption of Resolution 2000/7.¹¹⁷

C. THE NEGATIVE IMPACT OF GLOBALIZATION ON THE REALIZATION OF HUMAN RIGHTS

The Sub-Commission indicated that the negative effect of globalization on human rights was another motivating factor for the adoption of Resolution 2000/7.¹¹⁸ Specifically, the Sub-Commission relied on reports from two Special Rapporteurs, as well as from its working group on transnational corporations, to support a request for “[g]overnments and national, regional

112. *Id.* at ¶ 36. By explicitly referencing indigenous rights to plants, animals, and micro-organisms, the *Seminar on Principles and Guidelines* echo a major theme espoused within the Convention on Biological Diversity of 1992. Convention on Biological Diversity, June 5, 1992, 16 U.N.T.S. 229, U.N. Doc. UNEP/BIO.Div/N7 – INC.5/4 (1992). A product of the 1992 Earth Summit, the Convention on Biological Diversity seeks to encourage sustainable use of the components of biodiversity, and to share the benefits of such use in a fair and equitable way. The neem tree case and the debate over the use of terminator technology in agriculture, *see supra* section II.B and *infra* section II.C, are examples of biodiversity exploitation addressed by the Convention on Biological Diversity. Resolution 2000/7 indicated that the Convention on Biological Diversity was a motivating factor in the Sub-Commission’s decision to adopt Resolution 2000/7. *See* Resolution 2000/7, *supra* note 1. Further information about the Convention on Biological Diversity, as well as the text of the Convention, *see* <http://www.fao.org/WAICENT/FaoInfo/Agricult/AGP/AGPS/pgfafa/pdf/cbde.pdf> (last visited Dec. 2, 2003).

and international economic policy forums to take international human rights obligations and principles fully into account in international economic policy formulation".¹¹⁹ Because the Sub-Commission explicitly referenced these globalization reports as supporting their decision to adopt Resolution 2000/7, it is appropriate to examine those reports briefly.

1. The Special Rapporteurs' Preliminary Report

J. Oloka-Onyango and Deepika Udagama, Sub-Commission Special Rapporteurs on globalization and its impact on the full enjoyment of human rights, submitted a preliminary report to the Sub-Commission two months before the adoption of Resolution 2000/7.¹²⁰ The Special Rapporteurs' report began by reminding the Sub-Commission that globalization is not a purely economic phenomenon that is divorced from human values and policy decisions.¹²¹ Instead, the report contended that "[t]he boundaries within which the market operates are defined *politically*, in direct negotiations between governments in multilateral forums, such as the World Trade Organization."¹²² By asserting that political decisions shape the path of globalization, the Special Rapporteurs indicated that some human rights problems can be ameliorated at their source, by modifying the political decisions that enable globalization.¹²³

The report critiqued the World Trade Organization (WTO) for contributing to increasing global inequality and discrimination.¹²⁴ It also characterized the WTO structure and its assumptions about global trade as being heavily biased in favor of transnational corporations and developed nations.¹²⁵

120. J. Oloka-Onyango & Deepika Udagama, *The Realization of Economic, Social and Cultural Rights: Globalization and its impact on the full enjoyment of human rights*, ESCOR, Sub-Commission on the Promotion and Protection of Human Rights, 52d Sess., Provisional Agenda item 4, U.N. Doc. E/CN.4/Sub.2/2000/13 (2000) [hereinafter Special Rapporteurs' Report].

121. Special Rapporteurs' Report, *supra* note 120, at ¶¶ 1-5.

122. *Id.* at ¶ 7 (citing Fernando Enrique Cardoso, Globalization and International Relations, Public Address to the South African Institute of International Affairs in Johannesburg (Nov. 26, 1996) at 5-6).

123. See Special Rapporteurs' Report, *supra* note 120, at ¶¶ 7-10.

124. See *id.* at ¶¶ 13-19.

125. "Indeed, the assumptions on which the rules of WTO are based are grossly unfair and even prejudiced. Those rules also reflect an agenda that serves only to promote dominant corporatist interests that already monopolize the arena of international trade." Special Rapporteurs' Report, *supra* note 120, at ¶ 14.

While the WTO can be fairly characterized as democratic in form (since it allows one vote per member and purports to use consensus decision-making),¹²⁶ in practice the WTO has operated unfairly to less-developed nations, which are often denied participation in policy-making decisions.¹²⁷ Therefore, the report called for the WTO's deliberative and policy-setting procedures to be made more transparent, and more receptive to developing nations.

The Special Rapporteurs' report also disapproved of the WTO's intellectual property protection system,¹²⁸ positing that the TRIPS' guarantee of the patentability of plant varieties and life forms was a legal and economic usurpation.¹²⁹ Furthermore, the Special Rapporteurs recommended that if the WTO truly desired a commitment to a balanced trade liberalization scheme, it would embrace a dialogue of inclusion for developing nation concerns.¹³⁰

2. The Working Group on the Working Methods and Activities of Transnational Corporations

One further precursor of Sub-Commission Resolution 2000/7 arose in the context of the Sub-Commission's study and drafting of obligations that transnational corporations and other business enterprises owe to human rights.¹³¹ In its

126. *Id.* at ¶ 16.

127.

[W]hether one considers the dispute settlement procedures, the mechanisms for implementing agreements or the areas selected for negotiations, one comes to realize that the WTO structure is heavily tilted in favour of developed countries, such that developing countries are, de facto, kept away from decision-making mechanisms and from policy-making; similarly, their own specific problems are not sufficiently taken into account.

Special Rapporteurs' Report, *supra* note 120, at ¶ 16 (citing Anne-Christine Hubbard and Marie Guirand, *The World Trade Organization and Human Rights*, International Federation of Human Rights, Position Paper (November 1999)).

128. *See supra* section II.A(2).

130. "[The WTO] must not only include intellectual property protections of interest to the developed countries, but also address issues of current or potential concern for developing countries, such as property rights for knowledge embedded in traditional medicines, or the pricing of pharmaceuticals in developing country markets." Special Rapporteurs' Report, *supra* note 120, at ¶ 19 (citing Joseph F. Stiglitz, *Trade and the Developing World: A New Agenda*, CURRENT HISTORY 387 (November 1999)).

131. E.S.C. Res. 1998/8, *The relationship between the enjoyment of economic, social and cultural rights and the right to development, and the working methods and activities of transnational corporations*, ESCOR,

resolution 1998/8 of 20 August 1998 the Sub-Commission decided “to establish, for a three-year period, a sessional working group of the Sub-Commission, composed of five of its members, taking into account the principle of equitable geographical distribution, to examine the working methods and activities of transnational corporations.”¹³² The first meeting of the Working Group in 1999 requested preparation of a draft code of conduct for transnational corporations.¹³³ While the first draft code of conduct did not contain a provision on intellectual property and human rights, a more recent document¹³⁴ produced by members of the Working Group tracks Article 7 of the TRIPS Agreement.¹³⁵

The development of genetically modified “terminator” seeds in the late 1990s was a clear example of questionable corporate behavior that motivated the adoption of Sub-Commission Resolution 2000/7. Terminator technology enables seed suppliers to create strains of crop seeds that are incapable of reproducing.¹³⁶ Agribusiness companies “stood to make huge profits from the technique since it meant that farmers could not continue holding over seeds produced in one growing season for use in the next - a widespread practice in most developing countries.”¹³⁷ Although many other agricultural companies were also developing genetically modified seeds, the Monsanto Corporation became the target of widespread public concern over the anticipated sales of sterile seeds in the markets of developing nations.¹³⁸ The international furor eventually led

138. In fact, at the time Monsanto promised not to market sterile seed

Monsanto to pledge that it would not commercialize the terminator technology that creates sterile seeds.¹³⁹ Although Monsanto's declaration heralded a significant victory for developing countries, critics of terminator technology were quick to note that the dangers of genetic manipulation of seeds had by no means vanished.¹⁴⁰ At the time of its announcement not to market sterile seeds, Monsanto was believed to have 87 other terminator patents pending in developing countries,¹⁴¹ including one for a genetic modification that would "make a seed not germinate unless exposed to a certain chemical."¹⁴² Other major agribusinesses were pursuing similar patents for technology that could be used to control various "developmental processes in plants - including germination, sprouting, flowering and fruit ripening."¹⁴³ The potentially devastating effect that such technology could have on developing nations' agricultural sectors typified the concerns that motivated the Sub-Commission to create the Working Group on the methods and practices of transnational corporations, and was a significant factor in the Sub-Commission's decision to adopt Resolution 2000/7.¹⁴⁴

III. THE GENESIS AND ADOPTION OF SUB-COMMISSION RESOLUTION 2000/7

As the preceding section of this article shows, human rights concerns had been expressed with regard to intellectual property protection and global trade before the Sub-Commission adopted Resolution 2000/7. The Sub-Commission,

technology, it did not yet possess the rights to that specific technique. The technology was jointly developed by the USDA and Delta and Pine Land Company, a smaller business that Monsanto was attempting to take over. Doc. E/CN.4/2002/54 (2002).

however, had a more immediate catalyst for Resolution 2000/7 and its call for a human rights approach to devising international intellectual property protection and global trade regimes.

In late July 2000, a Lutheran World Fund representative¹⁴⁵ named Peter Prove submitted to the Sub-Commission a joint statement by three NGOs.¹⁴⁶ This statement urged the Sub-Commission to “take concrete action on TRIPS . . . [by] reassert[ing] the primacy of human rights obligations over the commercial and profit-driven motives upon which agreements such as TRIPS are based.”¹⁴⁷ The statement specifically called attention to human rights implications of economic globalization, TRIPS’ acceptance of biopiracy, and TRIPS’ stringent protection of TNC interests with respect to technology transfers.¹⁴⁸

Issues of globalization, indigenous rights protection, and TNC behavior had been separately mentioned for years before Prove submitted the joint statement.¹⁴⁹ Nonetheless, the Sub-Commission had not taken any action in regard to TRIPS and international intellectual property protection.¹⁵⁰ Prove found an ally in Asbjørn Eide, a Norwegian member of the Sub-Commission.¹⁵¹ Eide proposed a resolution criticizing existing international intellectual property regimes.¹⁵² Because no one anticipated the proposal, there was little opposition to Eide’s

152. *Id.*

resolution expressing human rights concerns about TRIPS.¹⁵³ This lack of opposition, combined with the Sub-Commission's awareness of the related problems presented by globalization and indigenous rights, helped Eide to push international intellectual property protection onto the Sub-Commission's agenda.¹⁵⁴

Although the Sub-Commission softened its tone somewhat in comparison to the forceful language of the NGO statement, the actions urged by Resolution 2000/7 were nonetheless a significant set of propositions. Referencing Daes' work on indigenous cultural rights, problems highlighted in the globalization report,¹⁵⁵ and "actual or potential conflicts . . . between the implementation of the TRIPS Agreement and the realization of economic, social and cultural rights",¹⁵⁶ the resolution made the following requests: (1) that governments give primary consideration to human rights objectives when crafting national policy and legislation pertaining to intellectual property; (2) that intergovernmental organizations provide similar integration of human rights principles into their policies and practices; (3) that the WTO in particular take human rights obligations into account when reviewing the TRIPS Agreement; and (4) that various U.N. bodies (including the High Commissioner for Human Rights (HCHR), the Committee on Economic, Social and Cultural Rights, and the Secretary-General) take further measures to analyze the human rights impacts of the TRIPS Agreement.¹⁵⁷

IV. REACTIONS TO RESOLUTION 2000/7

If the relationships between international intellectual property protection, globalization, and human rights had not been particularly visible before the summer of 2000, they certainly were subjected to more detailed scrutiny after the Sub-Commission adopted Resolution 2000/7. The Sub-Commission's resolution generated responses from U.N. bodies, intergovernmental organizations, and governments.

A. THE HIGH COMMISSIONER'S REPORT ON TRIPS AND HUMAN RIGHTS

Pursuant to the Sub-Commission's request, the High Commissioner for Human Rights (HCHR) submitted a report on the impact of TRIPS on human rights. The HCHR's report undertook a two-step analysis. First, the report assessed the degree to which TRIPS was compatible with a human rights approach to intellectual property protection.¹⁵⁸ Second, to the extent that TRIPS did not comport with human rights standards, the report made recommendations for implementing flexibility within the TRIPS Agreement that would foster a more human rights-oriented approach to international intellectual property protection.¹⁵⁹

The HCHR determined that as currently implemented, TRIPS was not fully compatible with human rights objectives. First, the HCHR noted that "the overall thrust of the TRIPS Agreement is the promotion of innovation through the provision of commercial incentives. The various links with the subject matter of human rights . . . are generally expressed in terms of exceptions to the rule rather than the guiding principles themselves".¹⁶⁰ Second, TRIPS explicitly details intellectual property *rights*, but refers only to general *responsibilities* of intellectual property holders.¹⁶¹ The HCHR indicated that, for States parties to both TRIPS and ICESCR, the balance of interests identified in TRIPS Article 7¹⁶² might not be sufficient to meet its human rights obligations under ICESCR.¹⁶³ Third, the HCHR noted that the TRIPS-imposed

158. *The impact of the Agreement on Trade-Related Aspects of Intellectual Property Rights on human rights: Report of the High Commissioner*, ESCOR, Commission on Human Rights, Sub-Commission on the Promotion and Protection of Human Rights, 52nd Sess., Provisional Agenda item 4, ¶ 15, U.N. Doc. E/CN.4/Sub.2/2001/13 (2001) [hereinafter *High Commissioner's TRIPS Report*].

159. *See id.* at ¶¶ 60-69.

160. *Id.* at ¶ 22.

161. *Id.* at ¶ 23.

162. *See supra* note 37 and accompanying text.

163. ICESCR Article 15 delineates a need to balance protection of the interests of intellectual property holders and the public. In this respect, ICESCR is similar to TRIPS Art. 7. However, the HCHR noted that ICESCR Art. 15 must be read in conjunction with ICESCR Art. 5, which holds that nothing in ICESCR can justify any act aimed at the destruction of any of its rights or freedoms or to limit a right beyond what is provided for in ICESCR. *High Commissioner's TRIPS Report*, *see supra* note 158, at ¶ 13. Hence, ICESCR may well require greater obligations to realize human rights than does TRIPS Art. 7.

obligation “to provide protection for all forms of technology has an impact on States’ ability to decide on development strategies.”¹⁶⁴ These limitations originate from similar policies in industrialized countries and do not necessarily coincide with objectives of developing nations.¹⁶⁵ In addition, some developing nations lack the requisite infrastructure to implement the developed nation policies mandated by TRIPS.¹⁶⁶ Further, the HCHR noted that TRIPS contained no provisions for the protection of cultural heritage and indigenous rights.¹⁶⁷

In light of these shortcomings the High Commissioner made a series of recommendations.¹⁶⁸ First, States should monitor TRIPS implementation through national legislation to ensure that it meets the human rights standards detailed in the ICESCR.¹⁶⁹ Second, the HCHR encouraged States to modify their intellectual property regimes to provide protection for indigenous community interests.¹⁷⁰ Third, States should pass legislation that ensured access to essential drugs, so as to protect the right to the highest available standard of health.¹⁷¹ Fourth, the High Commissioner suggested that TRIPS Article 7 be amended to include an explicit reference to human rights.¹⁷² Finally, the High Commissioner encouraged the Sub-Commission to continue examining the interaction of intellectual property rights and other human rights.¹⁷³

164. *High Commissioner’s TRIPS Report*, *supra* note 158, at ¶ 24.

165. *Id.* at ¶ 25.

166. *See id.* at ¶¶ 24-5.

167. *Id.* at ¶ 26.

168. *Id.* at ¶¶ 59-70.

169. *See id.* at ¶ 61.

170. *See id.* at ¶ 65.

171. A large portion of the High Commissioner’s Report was devoted to an analysis of whether TRIPS left sufficient room for States to address public health issues; Brazil’s approach to its national AIDS crisis was one focus of this discussion. For a more detailed discussion of the Brazil case, *see infra* notes 187-194 and accompanying text.

The High Commissioner’s Report determined that TRIPS does allow for States to enact legislation allowing compulsory licensing and parallel importation of drugs in times of public health emergency. As a result, the High Commissioner recommended that States pass national legislation securing those privileges. *High Commissioner’s TRIPS report*, *supra* note 158, at ¶ 66.

172. *High Commissioner’s TRIPS Report*, *supra* note 158, at ¶ 68.

173. The High Commissioner’s recommendations can be found in *High Commissioner’s TRIPS Report*, *supra* note 158, at ¶¶ 59-70.

B. THE WTO/WIPO RESPONSE

The WTO and the World Intellectual Property Organization (WIPO) were surprised by and did not agree with Resolution 2000/7's criticisms. Both organizations stated that the tension between rights of intellectual property holders and the public interest was "complementary rather than mutually exclusive",¹⁷⁴ and that TRIPS Article 7 adequately reflected this complementary tension. With respect to drug access, the organizations contended that Article 8's recognition of States' interest in "protecting health",¹⁷⁵ coupled with Article 31's provisions for limited exceptions to the exclusivity of patent protection,¹⁷⁶ sufficiently enabled States to address their public health concerns.¹⁷⁷ The WTO acknowledged that many national intellectual property regimes did not provide comprehensive protection for traditional knowledge.¹⁷⁸ Nonetheless, the WTO thought that TRIPS mandated complete protection of traditional knowledge, and that gaps in coverage might be better filled by national legislation rather than by a retooling of TRIPS itself.¹⁷⁹ In short, the WTO and WIPO did not concur with the Sub-Commission's conclusion that TRIPS conflicted with human rights objections.

C. STATE RESPONSES

Echoing the WTO/WIPO positions, the European Commission also asserted that TRIPS adequately provided for

174. *Intellectual property rights and human rights: Report of the Secretary-General*, ESCOR, Commission on Human Rights, Sub-Commission on the Promotion and Protection of Human Rights, 52nd Sess., Provisional Agenda item 4, § II.B.2, U.N. Doc. E/CN.4/Sub.2/2001/12 (2001). The Secretary-General's report consisted of reactions to Resolution 2000/7 from various nations, NGOs, and intergovernmental bodies that were submitted to the Secretary-General. Section II(B) of this document contained the WTO's response. *Id.* at § II.B.1-13. Responses from other organizations were included in a separate document. *See generally Intellectual property rights and human rights: Report of the Secretary-General, Addendum*, ESCOR, Commission on Human Rights, Sub-Commission on the Promotion and Protection of Human Rights, 52nd Sess., Provisional Agenda item 4, U.N. Doc. E/CN.4/Sub.2/2001/12/Add.1 (2001) [hereinafter *Addendum*] (providing that the Secretary-General received additional replies, including one from WIPO).

179. *Id.*

the realization of human rights. Like the WTO and WIPO, the Commission thought that TRIPS Article 7 struck an appropriate balance of interests.¹⁸⁰ The Commission reiterated that TRIPS principles should not allow patenting of traditional knowledge.¹⁸¹ The Commission noted that TRIPS does not speak directly to the issue, but believed that this silence provided States with enough leeway to enact legislation specific to traditional knowledge if they so desired.¹⁸² The Commission also encouraged the creation of traditional knowledge databases and the inclusion in all patent applications of the geographic origin of any biological material in order to reduce conflicts in instances like the “neem tree oil” case.¹⁸³

The European Commission did not believe that TRIPS needed to be altered in order to enable States to address public health concerns.¹⁸⁴ The Commission thought that developing nations and the international community should concentrate on preventing disease, fostering drug distribution mechanisms, and building health care infrastructures, rather than pressuring large pharmaceutical companies to provide cheap medicines.¹⁸⁵ The Commission also voiced concerns about any provisions that deny intellectual property protection, arguing that rigorous patent protection is necessary in order to provide pharmaceutical companies with an incentive to continue research and development programs.¹⁸⁶

Unlike the European Commission, some States believed that affordable medicine constituted a crucial step in promoting public health. The most visible test of TRIPS’ mandates came from Brazil, whose 1997 decision to enact compulsory licensing legislation enabled generic production of internationally

182. *Id.* at ¶¶ 22-23.

183. *Id.* at ¶¶ 23-24.

184. *Id.* at ¶ 12, 31.

185. *Id.* at ¶ 12. The Commission also indicated a concern that providing cheap drugs could lead to problems with parallel importation. When a pharmaceutical company engages in differential pricing based on the purchasing power of a given market, it runs the risk of selling drugs cheaply to a poor nation that may turn around and re-sell the product to a nation with greater purchasing power. *Id.* at ¶ 13. This problem would leave the poor nation with no drugs and reduce the pharmaceutical company’s profits.

186. *Id.* at ¶ 14.

patented AIDS drugs.¹⁸⁷ Although contentious at the time, Brazil's acts have generally been considered a stunning public health success. Within four years of initiating its compulsory licensing program, Brazil reduced its AIDS death rate by 50%, while simultaneously reducing per capita expenditures on pharmaceuticals.¹⁸⁸ Indeed, the *High Commissioner's TRIPS Report*, discussed above, praised the Brazilian government for "implementing the public health safeguards in the TRIPS Agreement" in a way that "has successfully married implementation of the Agreement with its obligations under human rights law".¹⁸⁹

The United States contested Brazil's compulsory licensing program. In January 2001, the United States requested the establishment of a WTO dispute resolution panel, alleging that Brazil's compulsory licensing law violated U.S. patent holders' rights guaranteed by TRIPS.¹⁹⁰ The U.S. subsequently agreed to drop the WTO suit, provided that Brazil consult with the U.S. government if Brazil intended to implement compulsory licensing in the future.¹⁹¹

The United States' decision to drop its complaint was influenced by the U.N. Commission on Human Rights' April 23, 2001, adoption of a resolution supporting Brazil's compulsory licensing program. Commission Resolution 2001/33 called upon States to "pursue policies . . . which would promote . . . [t]he availability in sufficient quantities of pharmaceuticals . . . used to treat pandemics such as HIV/AIDS".¹⁹² To that end, the

187. Decreto No. 9.279, de 14 de Mayo de 1996, D.O. de 15.05.1996. Article 68 of this law authorized the government to provide for compulsory licensing where a patent holder exercises patent rights in an abusive manner, and in cases of national emergency or public interest. These provisions mimic the TRIPS' compulsory licensing provision outlined in Article 31. *High Commissioner's TRIPS Report*, see *supra* note 158, at ¶ 55.

188. *High Commissioner's TRIPS Report*, *supra* note 158, at ¶ 57. Brazil also saw an 80% decrease in hospitalization due to opportunistic diseases that so often afflict AIDS patients. The Brazilian Ministry of Health reduced its drug expenditure from \$336 million to \$319 million between 1999 and 2000, yet also managed to deliver drugs to an additional 12,000 patients during that same 12-month span. Local production of generic drugs has cut production costs by an average of 70% since the inception of the compulsory licensing program.

192. Commission on Human Rights Res. 2001/33, *Access to medication in*

Commission encouraged States to “adopt legislation . . . to safeguard access to such preventative, curative or palliative pharmaceuticals or medical technologies from any limitations by third parties”.¹⁹³ Furthermore, the Commission called on States to “refrain from taking measures which would deny or limit equal access for all persons to such . . . pharmaceuticals and medical technologies”.¹⁹⁴ This resolution endorsed Brazil’s compulsory licensing program, and discouraged aggressive pharmaceutical patent protection such as the U.S. complaint pending with the WTO at the time.¹⁹⁵ The U.S. abstention constituted the only opposition to the otherwise unanimous adoption of Commission Resolution 2001/33.

A scenario similar to the US-Brazil dispute took place when the Pharmaceutical Manufacturers Association of South Africa sued the South African government in South Africa’s Constitutional Court.¹⁹⁶ The pharmaceutical manufacturers’ alleged that an amendment to South Africa’s patent laws infringed on the manufacturers’ property rights and conflicted with TRIPS-mandated patent protection.¹⁹⁷ The

the context of pandemics such as HIV/AIDS, ESCOR, Commission on Human Rights, 57th Sess., 71st mtg., ¶ 2(a) U.N. Doc. E/CN.4/RES/2001/33 (2001) [hereinafter Commission on Human Rights Res. 2001/33], available at <http://www.hri.ca/forthecord2001/documentation/commission/2001-33.htm> (last visited Dec. 2, 2003).

197. The Medicines and Related Substances Control Amendment Act, No. 90 of 1997, gave the South African Health Minister power to define “prescribed conditions” for the supply of “more affordable medicines” in “certain circumstances.” *See Pharm. Mfrs. Ass’n of S. Afr.*, at ¶ 2.1. One practical effect of the Amendment Act was to give the Health Minister the power to enact parallel importation of patented drugs. *See Sarah Joseph, Pharmaceutical Corporations and Access to Drugs: The “Fourth Wave” of Corporate Human Rights Scrutiny*, 25 HUM. RTS. Q. 425, 442 (2003). The amendment also gave the Health Minister the power to prescribe conditions under which compulsory licenses could be granted. *See Pharm. Mfrs. Ass’n of S. Afr.*, at ¶ 2.2. The South African government already had the ability to grant compulsory licenses pursuant to the Patents Act of 1978. *Joseph* at 442. The Amendment Act, however, increased the discretion of the government to determine the conditions under which compulsory licenses would be granted. *See Pharm. Mfrs. Ass’n of S. Afr.*, at ¶¶ 2.1 & 2.2.

The pharmaceutical manufacturers alleged that Amendment Act authorized the government to deprive pharmaceutical patent holders of their intellectual property, or to appropriate that property without providing compensation. *See*

pharmaceutical manufacturers settled their suit in April 2001, in light of the South African government's agreement to consult a pharmaceutical working group before implementing its new laws.¹⁹⁸ The pharmaceutical group's decision to drop their complaint was likely prompted in part by strong global protest to the suit. The Commission on Human Rights' impending adoption of Resolution 2001/33 (which endorsed Brazil's compulsory licensing program) and Sub-Commission Resolution 2000/7 may also have contributed to the decision to drop the South African suit.¹⁹⁹

D. RESPONSE OF THE COMMITTEE ON ECONOMIC, SOCIAL AND CULTURAL RIGHTS

Three months after the adoption of Sub-Commission Resolution 2000/7, the Committee on Economic, Social and Cultural Rights held a day of discussion in November 2000 to consider whether TRIPS potentially conflicts with human rights norms in the ICESCR.²⁰⁰ The day of discussion was

Pharm. Mfrs. Ass'n of S. Afr., at ¶ 2.3. Such a taking was alleged to violate Section 25 of the South African Constitution, which states that "[p]roperty may be expropriated only . . . for a public purpose or in the public interest, and subject to compensation". CONST. OF THE REPUBLIC OF SOUTH AFRICA, Act 108 of 1996, Chapter 2, § 25, part 2 (1996), available at <http://www.polity.org.za/govdocs/constitution/saconst.html> (last visited Oct. 23, 2003). Further, the pharmaceutical manufacturers alleged that the parallel importation authorization violated TRIPS' Article 27 prohibition on discrimination with respect to importation or local production of patented products. See *Pharm. Mfrs. Ass'n of S. Afr.*, at ¶ 2.4.

198. The Minister of Health agreed to invite a working party from the pharmaceutical industry to consult with the government in formation of policies, legislation, and regulations that would be enacted to implement the Amendment Act. The government, however, made explicit mention of TRIPS' allowance for the adoption of measures necessary to protect public health and broaden access to medicines. *Joint Statement of Understanding Between the Republic of S. Afr. and the Applicants, in the matter between: The Pharm. Mfrs. Ass'n of S. Afr. v. The President of the Republic of S. Afr.*, ¶ 2 (April 19, 2001), available at http://www.efpia.org/3_press/20010419.htm (last visited Oct. 23, 2003).

199. The South African pharmaceutical manufacturers settled their suit on April 19, 2001. The Commission on Human Rights adopted Resolution 2001/33 on April 23, 2001. Commission on Human Rights Res. 2001/33, *supra* note 192. It seems plausible to think that the pharmaceutical manufacturers were tracking the buildup to Resolution 2001/33's adoption, and understood that a U.N. endorsement of compulsory licensing would reflect badly on the pharmaceutical manufacturers' suit.

200. *Report on the Twenty-second, Twenty-third and Twenty-fourth Sessions*, ESCOR, Committee on Economic, Social and Cultural Rights, 22nd-24th Sess., Supp. No. 2, ¶ 578, U.N. Doc. E/2001/22 and E/C.12/2000/21 (2000) [hereinafter *Report on the 22-24 Sessions*].

intended to lay a foundation for the eventual adoption of a general comment on the relationship between intellectual property rights and human rights standards.²⁰¹

The discussion relied heavily on a discussion paper prepared by Audrey Chapman, a representative of the American Association for the Advancement of Science.²⁰² Peter Prove, the LWF lobbyist who provided the initial impetus for the Sub-Commission to consider adopting Resolution 2000/7, also contributed to the discussion.²⁰³ In addition, background papers and commentary on cultural property and traditional knowledge rights played a prominent part in the discussion.²⁰⁴

Chapman's presentation to the Committee on Economic, Social and Cultural Rights stated that the creation of the WTO and TRIPS had strengthened the world intellectual property regime in a way that was inconsistent with human rights norms.²⁰⁵ She further stated that the international intellectual property regime had "demonstrated detrimental effects to the rights enshrined in [ICESCR]."²⁰⁶ She specifically noted that the current intellectual property regime did not apply to indigenous creations and knowledge, negatively affected the right to health by reducing the availability of pharmaceuticals, and threatened the right to food by extending broad plant patent protection to a few agricultural companies that hold

patents on the genomes of important global crops.²⁰⁷ The Economic and Social Committee's Chairperson concluded the discussion by reiterating the Committee's intent to draft a general comment on intellectual property and human rights.²⁰⁸

The Committee on Economic, Social and Cultural Rights has not yet adopted a General Comment yet. Instead, the Committee drafted a less visible and less ambitious statement that outlines their concerns about the effect of intellectual property regimes on key human rights principles derived from ICESCR.²⁰⁹ The Committee on Economic, Social and Cultural Rights stated that intellectual property has "a social function" and "should serve the objective of human well-being, to which international human rights instruments give legal expression."²¹⁰ In addition, "[h]uman rights are fundamental, inalienable and universal entitlements . . . whereas intellectual property rights . . . are instrumental . . . generally of a temporary nature, and can be revoked, licensed or assigned to someone else."²¹¹ The Committee also asserted that "[w]hile the State holds the primary duty to respect, protect and fulfil [sic] human rights, other actors, including non-State actors and international organizations, carry obligations, which must be subject to scrutiny."²¹²

The Committee elaborated on the most important obligations imposed by ICESCR. While acknowledging that ICESCR allows for "progressive realization" of some of the ICESCR's objectives, the Committee reminded States parties of "various obligations which have immediate effect, including core obligations."²¹³ Core obligations require States parties to "ensure the satisfaction of, at the very least, minimum essential levels of each of the rights' enunciated in [ICESCR]".²¹⁴ In particular, the Committee "emphasize[d] that any intellectual property regime that makes it more difficult for a State party to comply with its core obligations in relation to

health, food, [or] education . . . is inconsistent with the legally binding obligations of the State party.”²¹⁵

In addition to States’ core obligations in relation to health, food, and education, the Committee noted that ICESCR “sets out the need to balance the protection of public and private interests in knowledge.”²¹⁶ As the Committee explained:

On the one hand, article 15.1(a) and (b) [of ICESCR] recognizes the right of everyone to take part in cultural life and to enjoy the benefits of scientific progress and its applications. On the other hand, Article 15.1(c) recognizes the right of everyone to benefit from the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he or she is the author.²¹⁷

The Committee urged States to “strike a balance between those concurrent Covenant provisions” in developing intellectual property regimes.²¹⁸ The Committee referenced with approval the Doha Declaration on the TRIPS Agreement and Public Health, which “recognizes that intellectual property protection is important for the development of new medicines, but at the same time also recognizes the concerns about its effect on prices.”²¹⁹

In summary, the Committee’s statement reminded States parties of the “importance [of] the integration of international human rights norms into the enactment and interpretation of intellectual property law” in a balanced manner that protects public and private interests in knowledge without infringing on

fundamental human rights.²²⁰ When close questions arise about where the appropriate balance lies, States should draw a balance that maintains the integrity of human rights.

E. CONTINUING EFFORTS OF THE OFFICE OF THE HIGH COMMISSIONER FOR HUMAN RIGHTS

1. Report on Globalization

The High Commissioner's Report on the impact of TRIPS on human rights, discussed at Section IV(A) above, was the first of a triad of reports, prompted by the Sub-Commission's resolution and proposed by the Office of the High Commissioner, concerning human rights and trade. The second report examined the impact of globalization on the enjoyment of human rights by outlining issues that arise when "the liberalization of agricultural trade is viewed from a human rights perspective."²²¹ Specifically, the report examined the implementation of the 1994 WTO Agreement on Agriculture to highlight some of the problems stemming from the liberalization of agricultural trade.

The High Commissioner's report reminded WTO States of their obligations under international human rights instruments. In particular, the report noted that all WTO States are subject to the Universal Declaration of Human Rights, and that 112 of the 144 WTO States have ratified ICESCR.²²² Both instruments recognize the right of everyone to have an adequate standard of living, which includes the right to food.²²³ Article 2 of ICESCR binds parties to "take steps, individually and through international assistance and cooperation . . . with a view to achieving progressively the full realization of the rights recognized in the present Covenant".²²⁴ Article 28 of the Universal Declaration states that "[e]veryone

221. *Globalization and Its Impact on the Full Enjoyment of Human Rights: Report of the High Commissioner for Human Rights submitted in accordance with Commission on Human Rights resolution 2001/32*, ESCOR, Commission on Human Rights, 58th Sess., Provisional Agenda item 10, at ¶ 8, U.N. Doc. E/CN.4/2002/54 (2002).

222. *Id.* at ¶ 10.

223. See *Universal Declaration of Human Rights*, G.A. Res. 217 A(III), at art. 25, U.N. Doc. A/810 (1948), available at <http://www.unhcr.ch/udhr/index.htm> (last visited Nov. 11, 2003); see also *ICESCR*, *supra* note 4, at art. 11.

224. *ICESCR*, *supra* note 4, at art. 2.

is entitled to a social and international order in which the rights and freedoms set forth in this Declaration can be fully realized.”²²⁵ By reminding WTO States of their obligations under these instruments, the High Commissioner’s report indicated that WTO States have a binding obligation to protect and promote the right to food, even as they seek to liberalize trade in agriculture.²²⁶

The High Commissioner’s report concluded that the WTO Agreement on Agriculture (AoA) generates both positive and negative human rights results. On the positive side, the AoA increases transparency and accountability in international agricultural trade, which the High Commissioner characterized as an “important first step . . . towards a more fair international trading system.”²²⁷

The High Commissioner’s report also highlighted some of the potential human rights issues that might arise as a result of global trade liberalization in agriculture. First, liberalization has encouraged farm consolidation.²²⁸ Although this trend has increased productivity and competition, it has also marginalized small farmers and farm laborers, and exposed communities to increases in food prices.²²⁹ Second, trade liberalization has forced some developing countries into a chronic system of net food importation. The resultant payment imbalances could eventually hinder developing nations’ ability to realize their right to development.²³⁰ Third, agricultural price fluctuations created by trade liberalization could negatively impact some nations’ ability to finance development, or even affect a state’s ability to guarantee availability of

food.²³¹

2. Report on Liberalization of Trade in Services

In the summer of 2002, the Office of the High Commissioner submitted the final report in its tripartite examination of the interaction of trade and human rights. The report focused on the human rights effect of liberalization of trade in services. In the same way that its report on globalization used a specific agreement (the AoA) as a case study, the High Commissioner's report on trade in services examined the General Agreement on Trade in Services (GATS).

The report again reminded WTO States of their obligations under ICESCR and the Universal Declaration to promote the right to food. The report also noted the right to development.²³² Since liberalization of trade in services encompasses a wider range of activities than agricultural trade services, the report extended the scope of State obligations to include the rights to health, education, water, and labor.²³³ The High Commissioner characterized States as the "duty bearer[s] for human rights,"²³⁴ and therefore asserted that States have an affirmative obligation to (1) monitor the realization of human rights, (2) develop domestic trade policies that promote human rights objectives and (3) regulate extra-national third party activities that affect human rights in the State.²³⁵

The High Commissioner's report stressed that liberalization of trade in services can provide a positive effect on human rights.²³⁶ But, the report also noted that the liberalization of trade in services, without adequate governmental regulation and proper assessment of its effects, can also have undesirable effects.²³⁷ Therefore, "[t]he key

233. *Liberalization of Trade in Services and Human Rights: Report of the High Commissioner*, Sub-Comm'n on the Promotion and Protection of Human Rights, 54th Sess., Provisional Agenda Item 4, at ¶ 7, U.N. Doc. E/CN.4/Sub.2/2002/9 (2002).

234. *Id.* at ¶ 10.

235. To this end, the High Commissioner encouraged State ministries and agencies to conduct human rights assessments that would promote popular participation and consultation with the people affected by trade liberalization. The High Commissioner also advocated for increased "transparency and accountability" with respect to the methods of assessment and trade negotiations. *Id.* at ¶¶ 10-13.

236. *Id.* at ¶ 39.

237. *Id.*

question from a human rights perspective is not whether liberalization does or does not promote human rights; rather, it is how to determine the right form and pace of liberalization to ensure the protection of human rights and how to reverse policies that are unsuccessful.²³⁸ The report indicated that effective state regulation and oversight, buttressed by international assistance to developing countries, is integral to controlling the pace and form of liberalization.²³⁹

The High Commissioner noted with approval GATS' recognition of the principle of non-discrimination.²⁴⁰ In the context of trade law, non-discrimination means equal treatment for national and foreign service providers alike. The non-discrimination principle can be extended, however, to encompass the human rights view of non-discrimination in terms of race, color, sex, etc.²⁴¹ The High Commissioner also endorsed GATS' exceptions for the purposes of protecting public morals, as well as human, animal and plant life, and the protection of individual privacy.²⁴²

V. PROGRESS

Sub-Commission Resolution 2000/7 encouraged a series of investigations into the human rights implications of international intellectual property protection and trade liberalization. The heightened global awareness about the human rights implications of intellectual property and global trade has produced some positive results. Most significantly, the WTO Ministerial Conference at Doha in November 2001 responded to several of those human rights concerns.

The Ministerial Conference adopted a special declaration

238. *Id.* at ¶ 50.

239. *Id.* The High Commissioner specifically stressed the need for regulation that would implement effective competition policies and corporate transparency, as well as national policies reflecting a commitment to providing universal service. The High Commissioner stated that “[i]n human rights terms, the need to regulate . . . is in fact a *duty* to regulate . . . to ‘fulfil’ [sic] human rights *requires* States to take appropriate legislative, administrative, budgetary, judicial and other measures towards the full realization of such rights.” *Id.* (emphasis added).

240. *Id.* at ¶ 59.

241. *Id.*

242. *Id.* at ¶ 63. The High Commissioner noted that these protections are “familiar themes to human rights law”, and stated that although “a human rights approach would place the promotion of human rights at the centre of the objectives of GATS rather than as permitted exceptions, these links nonetheless provide an entry point for a human rights approach to liberalization”. *Id.*

that explicitly addressed the issue of the interaction of TRIPS and public health concerns. The declaration stated that “the [TRIPS] Agreement can and should be interpreted and implemented in a manner supportive of WTO Members’ right to protect public health and, in particular, to promote access to medicines for all.”²⁴³ To that end, the declaration reminded WTO States that TRIPS recognizes the right to grant compulsory licenses, as well as the ability to implement parallel importation mechanisms.²⁴⁴ Furthermore, the declaration noted that “public health crises, including those relating to HIV/AIDS, tuberculosis, malaria and other epidemics, can represent a national emergency or other circumstances of extreme urgency.”²⁴⁵ It is these circumstances which enable States to initiate compulsory licensing under TRIPS Article 31.²⁴⁶

The Ministerial Conference’s declaration instructed the Council for TRIPS (a TRIPS review body) to take into account the issues pertaining to traditional knowledge and folklore when reviewing TRIPS’ exclusivity requirements.²⁴⁷ Furthermore, the declaration stated that “special and differential treatment for developing countries shall be an integral part of . . . enabl[ing] developing countries to effectively take account of their development needs, including food security and rural development.”²⁴⁸ In addition, the declaration recognized the “particular vulnerability of the least-developed countries and the special structural difficulties they face in the global economy,” and committed the WTO to “addressing the marginalization of least-developed countries in international trade and to improving their effective participation in the multilateral trading system.”²⁴⁹ Further, the declaration noted that “under WTO rules no country should be prevented from taking measures for the protection of human, animal or plant life or health . . . subject to the requirement that they . . . are otherwise in accordance with the

provisions of the WTO Agreements.”²⁵⁰ The declaration also reaffirmed the right of WTO members to regulate the supply of services under GATS,²⁵¹ and confirmed the WTO’s responsibility to make its operations transparent and democratic.²⁵²

The United States’ initial responses to the Doha Declaration’s objectives have been mixed. With respect to trade liberalization, the United States submitted to the WTO a proposal suggesting the removal of international regulatory procedures for financial and insurance services, and also recommended lowering trade restrictions in the telecommunications, energy, and environmental services.²⁵³ In addition, the Bush administration promised to contribute \$1 million to the “Doha Development Agenda Trust Fund, [which] aim[s] at building the capacity for developing countries to participate in the full range of WTO negotiations and activities agreed to in Doha.”²⁵⁴ In the agricultural realm, the United States is leading a drive to eliminate export subsidies within five years.²⁵⁵

The United States position on measures designed to provide affordable medication to treat AIDS and other epidemics has been more ambiguous. The Doha Declaration set a December 2002 deadline by which the Council for TRIPS was to have reached an agreement on a policy under which least-developed WTO Members could import generically manufactured copies of patented pharmaceuticals.²⁵⁶ The Council for TRIPS failed to meet that deadline amid reports of U.S. objections to the number of diseases and eligible importing nations that some WTO Members wanted to include in the scheme for relaxing pharmaceutical patent protection.²⁵⁷ In the

254. *Id.*

255. *Id.*

256. *Declaration on the TRIPS Agreement and Public Health*, *supra* note 243, at ¶ 6.

257. RAYMOND W. COPSON, AIDS IN AFRICA, at CRS-1, available at <http://usinfo.state.gov/topical/global/hiv/ib10050aidsaf.pdf> (last visited Jan. 25, 2003). The U.S. State Department reported that some (unspecified) WTO Members sought to allow wealthier WTO Members onto the list of “poor country epidemic” nations that were meant to be the focus of the Doha

wake of that failure, the United States proposed an exception to TRIPS Article 31 that would allow least-developed nations with health epidemics to import generically manufactured drugs from developing nations that currently provide patent protection for the pharmaceuticals in question.²⁵⁸ While the U.S. proposal indicated a willingness to ease patent protection in some cases, it did not give explicit guidance as to which specific drugs could be manufactured.²⁵⁹

Declaration's emphasis on relaxations of patent protection allowable pursuant to TRIPS Article 31. In addition, the State Department reported that some WTO Members sought to expand the classes of drugs available for generic manufacture and import to include drugs not designed for the treatment of epidemic diseases (e.g., Viagra). See News Release, U.S. Department of State, International Information Programs, *U.S. Announces Interim HIV/AIDS Plan for Poor Countries*, Dec. 20, 2002, at <http://usinfo.state.gov/topical/econ/wto/02122002.htm> (last visited Jan. 25, 2003).

258. TRIPS currently allows WTO Members to use a compulsory license to import a generically manufactured drug from another country provided that the exporting country has not granted a patent on that drug. The problem is that TRIPS Article 31(f) currently prohibits a WTO Member that has granted patent protection from generically producing a drug for export, even if the importing country has a health epidemic and lacks the domestic infrastructure to manufacture generic drugs. The U.S. proposal envisions either a dispute resolution moratorium or a waiver of TRIPS Article 31(f) so that developing nations with the capacity to produce generic drugs could export those drugs to a least developed nation, even when the exporting nation has granted patent protection. The U.S. proposal also takes pains to note that exporting nations would be expected to "ensure that the medicines . . . are not diverted from the Member for which they were intended, either by being diverted to other markets or by leaking onto the domestic market of the exporting Member." Furthermore, the U.S. proposal indicates that an importing Member might still owe some discounted measure of compensation to the patent holder (although the licensing fees paid to the patent holder by the exporting nation would be used to offset the total amount of compensation owed by the importing Member). News Release, U.S. Department of State, International Information Programs, *A Second Communication from the United States of America Relating to Paragraph 6 of the Doha Declaration on the TRIPS Agreement and Public Health*, at <http://usinfo.state.gov/topical/econ/wto/tripshealth020625.htm> (last visited Jan. 25, 2003).

259. The U.S. proposal suggests that any WTO Member with least-developed nation status be presumed to have insufficient infrastructure to produce its own generic pharmaceuticals, and thus would be allowed to import generic drugs under the proposed exception to TRIPS Article 31(f). Developing Members not designated as "high income countries" would also be eligible to import generic drugs (thus Barbados, Brunei, Cyprus, Hong Kong, Israel, Kuwait, Liechtenstein, Macao, Malta, Qatar, Singapore, Slovenia, Taiwan and the United Arab Emirates would not be allowed to import generic pharmaceuticals even in cases of health epidemics). The U.S. proposal does provide a list of potential diseases that could qualify a Member for Article 31 exception (including ebola, African trypanosomiasis, cholera, dengue, typhoid,

On August 30, 2003, the WTO General Council for TRIPS resolved the dispute about implementing the Doha Declaration by adopting a decision which essentially permitted a patent exception rule to allow countries to produce medicine for export in order to fulfill public health needs in countries that do not have production capacities.²⁶⁰ The decision dealt with U.S. concerns that the patent exception rule would lead to the distribution of generic medicines for non-infectious diseases and with concerns about the re-export of such medicines to other markets.²⁶¹

and typhus fevers); it does not specify which pharmaceuticals could be generically produced. See *U.S. Announces Interim HIV/AIDS Plan for Poor Countries*, *supra* note 257.

260. *Implementation of paragraph 6 of the Doha Declaration on the TRIPS Agreement and public health*, TRIPS: Council for TRIPS, WTO Doc., WT/L/540, at ¶ 6 (Aug. 30, 2003), available at http://www.wto.org/english/tratop_e/trips_e/implem_para6_e.htm (last visited Sept. 1, 2003).

261. It accomplishes this goal by imposing upon importing nation the obligation to “take reasonable measures within their means. . . to prevent re-exportation of the products that have actually been imported into their territories under the system.” To the extent that developing nations lack the capacity to enforce the re-exportation restrictions, they are authorized to call upon developed country members to aid in enforcement. *Id.* at ¶ 4.

VI. CONCLUSION

Sub-Commission Resolution 2000/7 expressed concern for the human rights implications of trends in world trade and globalization. By adopting the resolution, the Sub-Commission thus played a role in a broader effort to develop a human rights approach to intellectual property protection, world trade, and globalization.
